

▶▶▶ The Scrambler XT is a classic kayak among scuba divers. Its low seat well creates stability without adding unnecessary width, which makes the XT easy to exit and re-enter from deep water without fear of overturning. From the little details (like inset strap eye placement to reduce wetsuit snags) to big issues (like additional weight capacity for those heavy tanks), the Scrambler XT is a kayak diver's dream. Plus, when you're done diving for the day, you can enjoy the Scrambler XT for fishing, surfing, and light touring. It might be the most versatile piece of equipment you'll own.
